

Go to -> <http://razorsql.com/download.html>

Download respective setup file based on your OS

Install RazorSQL

Open RazorSQL

On the left, click on -> “Click to connect to a Database”

Enter information as shown in the box below:

The screenshot shows the 'Connection Wizard' window in RazorSQL. The 'Add Connection Profile' tab is active. On the left, under 'CONNECTION TYPE', the 'JDBC (JTD Driver 2000-2014)' option is selected. The main configuration area includes the following fields and options:

- Profile Name:** db02
- DRIVER INFO:** Display Driver Details
- AUTHENTICATION:** SQL Server Authentication (selected), Windows Authentication
